

Save Time and Money on New Deployments

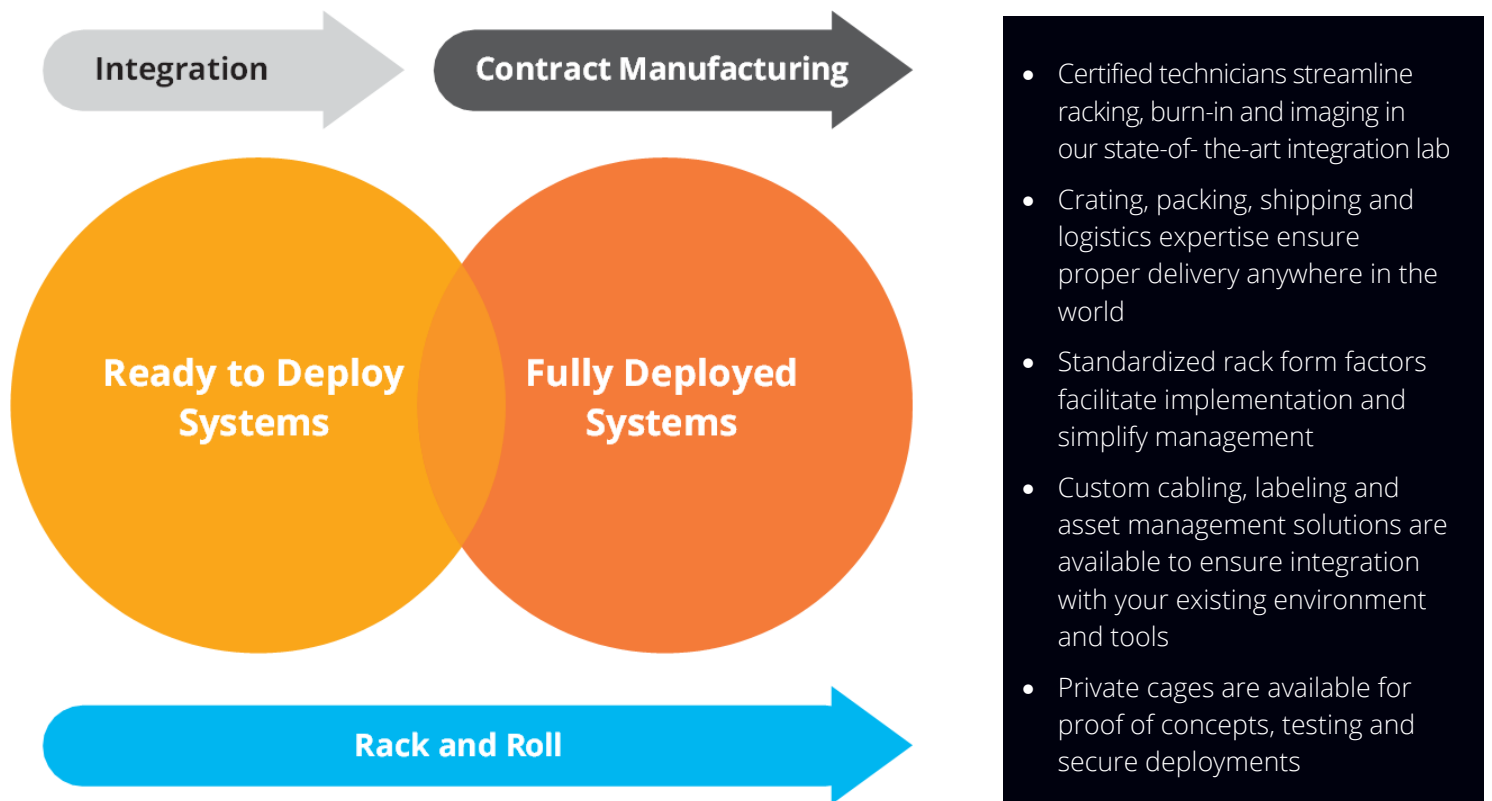

Realize significant savings as Trace3's Rack and Roll solutions right-sizes your data center capacity to meet growing demand. Keep your valuable internal resources focused on business-driven initiatives while we fast-track the design, purchase, load, and test of your new infrastructure. Bring fully tested and supported new capacity into production more quickly and cost effectively.

From tens to thousands, we can deliver rack solutions at any scale. Racked, stacked, cabled and labeled, your custom racks can be delivered anywhere in the world, ready to deploy—right out of the crate.

RACK AND ROLL SPEEDS TIME TO VALUE

We specialize in complex rack build solutions. Our integration specialists manage the build, testing and logistics to meet your new infrastructure requirements. Our certified engineers will ensure your fully integrated racks are built correctly, to your specifications and delivered on time and on budget. With the option to load specific OS and software, racks are built ready for production upon delivery.

RACK and ROLL

Built to Spec | Quality Assured | On Budget | Every Time

DESIGN

- Data center rack design
- Mission-critical system configuration
- Planning and procurement

TEST

- Component, server and rack level testing
- Break/fix and equipment replacement
- Performance testing and benchmarking

BUILD

- Hardware installation and configuration, firmware updates and software imaging
- Custom power and network cabling and labeling
- Complete rack integration—including systems, networking and storage

DEPLOY

- Global deployment and logistics
- Detailed asset and system documentation
- On-site installation and functional testing
- GroupWatch 24x7 support

TECHNOLOGY LAB

Our state-of-the-art Technology Labs offer a proof-of-concept, integration, test, and development platform unique in the industry. Gain hands-on experience with new products and technologies before you invest.

END-TO-END MANAGEMENT AND GLOBAL LOGISTICS

We have delivered thousands of fully-integrated racks to data centers all over the world. Our global deployment and logistics experience will ensure your racks are delivered safely to their destination(s).

- Purchase racks in a single SKU for ease of order and re-order
- Ease asset management with system data capture and complete rack documentation
- Facilitate implementation and management through standardized rack form factors
- Protect your investments with GroupWatch 24x7 support

Customized support options will reduce your IT management workloads with proactive case load management and break/fix services. GroupWatch will bring your systems back into production sooner.

Racked, stacked, cabled and labeled, allow Trace3 to deliver your rack solutions at any scale. To learn more, contact your Trace representative or find us at [Trace .com](https://www.trace3.com).
