

Enhancing and safeguarding your system security while adhering to industry regulations is critical for your business. With Patching as a Service, your systems will remain secure, compliant, and reliable, ensuring optimal performance, stability, and integrity.

### OVERVIEW

At Trace3, our Patching as a Service offering is designed to reduce the risk of cyber-attacks and enhance operational efficiency by automating patching to minimize downtime and keep your systems running optimally. Ensure your systems are compliant so you can focus on strategic initiatives, allowing your business to move forward.

### OFFERING DETAILS

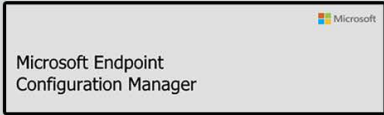

This service offering confirms compliance with industry regulations and standards, maintaining up-to-date software and systems. By reducing the need for manual patch management, we help you save on labor costs and prevent costly security breaches. We also provide regular updates to improve system stability and performance, reducing the likelihood of failures and outages, ensuring your business operates smoothly and securely.

What makes patching at Trace3 unique is we provide a dedicated engineer overseeing patching deployments, monitoring the process closely to enable seamless execution. Each deployment is strategically planned to enhance compliance, minimizing the risk of outages. By implementing patches on a regular basis, we help maintain system integrity and security. Your dedicated engineer proactively addresses any issues in real-time, guaranteeing each deployment is successful and any potential problems are immediately resolved. This vigilant approach significantly boosts compliance rates and maintains your systems stability.

## OFFERING DETAILS CONTINUED

Trace3 can patch the following systems:

CLIENT-HOSTED	TRACE3-HOSTED
  <b>ANSIBLE</b>  <b>AUTOMOX</b>  Microsoft Intune	 <b>datto</b> A <b>Kaseya</b> COMPANY  <b>AUTOMOX</b>

## VALUE

Our Patching as a Service offering is designed to alleviate the burden of patching from your team, allowing them to focus on strategic initiatives that drive your business forward. Patching can often feel like a tedious chore, consuming valuable time and resources that could be better spent on core business activities. By entrusting us with your patching needs, you'll free up your team's time to innovate, improve processes, and pursue strategic goals that contribute to your organization's success.

Patching with Trace3 not only ensures your systems remain secure and up to date, but also empowers your team to dedicate their efforts to achieving significant business outcomes. Whether it's enhancing customer experiences, streamlining operations, or developing new products and services, the time saved from routine patching tasks can be redirected to initiatives that have a direct impact on your bottom line. Let us handle the patches so your team can focus on what they do best – driving growth and success for your business

Regardless of where you are on your Managed Services journey, we have solutions to help you succeed. To learn more, contact your Trace3 representative or find us at [Trace3.com](https://www.Trace3.com).
