

Trace3 Security is equipped with an elite team of current and former CISOs (Chief Information Security Officers), security architects, and advisors with an average of 15 years' experience architecting and deploying next-generation adaptive security solutions. Our experts have a proven track record in augmenting and improving customer security programs and taking stakeholder and board conversations to the next level.

OVERVIEW

Security leadership may need assistance augmenting existing staff capabilities or stepping in to lead the day-to-day tasks. With many attack vectors in cybersecurity, there may also be gaps in your knowledge where advice is needed. Give your organization the edge it needs with Virtual Chief Information Security Officer (vCISO) consulting.

VALUE

Our experts assess your security program capabilities and controls across people, process, and technology to align your desired maturity level to actionable roadmaps. Whether you have a need to address compliance requirements (e.g., NIST, PCI, HIPAA, or CSA) or want to evaluate your security foundation, we can help with assessing the program you have today and building the program you need tomorrow. An effective security program enables your business to thrive by improving decision-making, identifying optimal IT investments, reducing overall risk, achieving regulatory compliance, and eliminating redundant processes and tasks.

Protect your organization with a dedicated Trace3 CISO to provide routine guidance for your security needs. For more information, contact your Trace3 Security expert or find us at [Trace3.com](https://www.Trace3.com).
