

2025 Trace3 Evolve Sponsors		
Partner	Technology Practice	Partner Overview
Outlier Sponsor		
Cisco	Security, Networking, AI Infrastrucutre, and Collaboration	Cisco empowers organizations with secure, scalable networking, cloud, and collaboration solutions—driving digital transformation, operational efficiency, and business resilience globally.
Diamond Sponsors		
Cohesity	Cyber Resilience	Cohesity combines AI-powered data security and management in a unified platform for innovative data protection and streamlined integration.
DELL	AI Infrastructure (Compute, Storage & Cyber Resilience)	Dell delivers integrated, innovative IT solutions at global scale—enabling customers to simplify, modernize, and grow with trusted infrastructure leadership.
Microsoft	Cloud & Productivity Platforms	Microsoft empowers organizations with leading software and a robust cloud marketplace, accelerating digital transformation, productivity, and scalable innovation for all customers.
MinIO	Data Platforms & Engineering, AI Object Storage	MinIO delivers AI-native, exascale object storage with industry-first natural language data access, record-breaking speed, and significant cost savings.
VIP Sponsors		
AMD	AI Infrastructure (GPU's & CPU's)	AMD delivers enterprise performance, reliability, and scalability for the data center, edge, and end user through energy efficiency, and advanced AI.
F5	Application Delivery & Security Platform	F5 empowers organizations with secure, reliable application delivery and a robust, resilient global supply chain—ensuring seamless performance and strategic agility.
HPE	AI Infrastructure (Compute, Storage & PCAI)	HPE accelerates digital transformation with secure, cloud-driven compute solutions for hybrid environments, delivering zero-trust resiliency for modern enterprises.
KnowBe4	Human Risk Management (Security Awareness & Training)	KnowBe4 empowers organizations to strengthen cyber defenses, transforming employees into a resilient last line of defense against social engineering threats.
NetApp	Data Platforms & Engineering (Storage & Hybrid Cloud)	NetApp unlocks data potential with scalable, reliable storage solutions and integrated hybrid cloud platforms for mission-critical enterprise workloads.
Palo Alto Networks	Cyber Security Platform (Next-Gen & Cloud Security)	Palo Alto Networks delivers unified, AI-powered cybersecurity platforms to protect data, applications, and users everywhere with comprehensive zero-trust solutions.
Rubrik	Cyber Resilience	Rubrik provides a comprehensive platform for proactively defending data against modern cyber threats and ensuring business continuity through robust recovery capabilities.
Elite Sponsors		
Alkira	Cloud & Network Infrastructure	Alkira provides cloud networking as-a-service, delivering unified and secure connectivity plus automation across multi-cloud, on-premises, and distributed environments.
Axonius	Endpoint Security & XDR	Axonius offers complete asset visibility and control, addressing security gaps and compliance risk with a unified cybersecurity asset management platform.
Commvault	Cyber Resilience	Commvault seamlessly protects, manages, and recovers enterprise data, delivering industry-leading backup, disaster recovery, and compliance solutions everywhere.
Concentric.ai	DSPM & Data Security & Risk	Concentric.ai’s autonomous data security platform discovers, classifies, and protects sensitive information, reducing insider and external data risks.
Crowdstrike	Endpoint Security & XDR	CrowdStrike stops breaches with cloud-native endpoint protection, threat intelligence, and managed detection and response for comprehensive cyberdefense.
Cyera	DSPM/Cloud Native Data Security	Cyera leverages AI-driven Data Security Posture Management to autonomously detect, classify, and secure data, accelerating organizational risk reduction.
Fortinet	Cyber Security Platform (Next-Gen & Cloud Security)	Fortinet delivers integrated, high-performing cybersecurity across networks, endpoints, and clouds, ensuring secure operations everywhere with end-to-end solutions.
IBM	Cloud & Infrastructure / AI & Automation	IBM empowers enterprise digital transformation with advanced AI, hybrid cloud solutions, cybersecurity expertise, and innovative industry-driven services.

Juniper	Networking Infrastructure & Performance	Juniper provides AI-driven networking solutions, delivering secure, high-performance, automated networks from the data center to the edge.
Kentik	Observability & Network Analytics	Kentik’s network observability platform offers real-time visibility, performance monitoring, and analytics to optimize and secure hybrid IT infrastructure.
LogicMonitor	Observability & Monitoring	LogicMonitor provides unified observability, automating monitoring, alerting, and analytics for IT infrastructure and application performance.
Mavvrik	Unified Financial Control for Cloud, On-Prem & AI	Mavvrik delivers AI-powered data governance and compliance, helping organizations discover, manage, and protect sensitive information at enterprise scale.
Meter	Network Infrastructure as a Service	Meter offers fully managed internet and networking infrastructure for offices, providing secure connectivity with zero operational overhead.
Nasuni	Data Platforms & Engineering (Cloud File Services)	Nasuni’s cloud-native file data platform enables global file sharing, data protection, and ransomware resilience for hybrid and multi-cloud environments.
Nutanix	Cloud & Virtualization (Hybrid/Multi-cloud)	Nutanix simplifies IT with hyperconverged infrastructure, enabling seamless hybrid multi-cloud operations, centralized management, and rapid enterprise scalability.
Pay-i	Digital Payment Solutions	Pay-i streamlines financial transactions for businesses, providing secure, automated payment solutions and seamless integration to boost efficiency and compliance.
Proofpoint	Endpoint Security, DLP & XDR	Proofpoint safeguards enterprises against advanced threats and data loss by delivering industry-leading email security, compliance, and user protection solutions worldwide.
Pure Storage	Data Platforms & Engineering (All-Flash Storage)	Pure Storage accelerates digital transformation with high-performance, scalable, and reliable all-flash storage solutions purpose-built for modern enterprise needs.
Qlik	Data Integration, Data Quality, and Analytics Solutions	Qlik delivers end-to-end data analytics, enabling organizations to transform raw data into actionable insights for smarter, data-driven decision making.
Qualys	Enterprise Cyber Risk & Security Platform	Qualys delivers continuous cloud-based security and compliance, providing organizations with automated visibility, vulnerability management, and defense against evolving cyber threats.
Sentra	Data Security	Sentra’s AI-powered, cloud-native data security platform discovers and classifies all your data accurately and automatically. Quickly achieve petabyte-scale data protection without the fuss.
Snyk	DevSecOps (Application Security)	Snyk empowers developers to build secure applications by identifying and remediating vulnerabilities in code, open source, containers, and cloud infrastructure.
Sophos	Cybersecurity as a Service	Sophos protects organizations with synchronized, AI-powered cybersecurity—delivering advanced endpoint, network, and cloud security solutions for comprehensive threat defense.
Supermicro	Servers, Storage systems, Switches and Software	Supermicro is a Rack-Scale Total IT Solutions provider that designs and builds an environmentally-friendly and energy-saving portfolio of servers, storage systems, switches, software, along with global support services.
Thales	Data Protection	Thales delivers digital security solutions—offering cybersecurity, cloud protection, encryption, communications, and intelligent systems for enterprises and governments.
Verkada	Cloud-Based Physical Security	Verkada reimagines physical security by integrating intelligent cloud-managed video surveillance, access control, and environmental sensors for safer, smarter spaces.
Strategic Sponsor		
360 Privacy	Digital Executive Protection Services	360 Privacy delivers comprehensive privacy protection, proactively securing personal and corporate digital footprints against data exposure and cyber risks globally.
Akamai	Content Delivery Network & Security	Akamai optimizes and secures digital experiences with industry-leading edge computing, web performance, and cloud security solutions for global enterprises.
Arctera	Data Compliance, Data Resilience & Data Protection	Arctera helps organizations address regulatory requirements and mitigate risks related to information governance, eDiscovery, and digital surveillance using AI-powered solutions to navigate privacy and industry regulations.

Arctic Wolf	Managed Detection & Response	Arctic Wolf delivers cloud-native security solutions and services through their Security Operations Cloud, that combines security operations with a concierge delivery model, acting as an extension of their clients' teams.
Armis	IoT & OT Security	Armis secures unmanaged and IoT devices, delivering real-time asset visibility and threat detection across IT, OT, and IoT environments.
ArmorCode	Application Security Posture Management (ASPM)	ArmorCode delivers unified application security posture management, enabling organizations to efficiently identify, remediate, and manage security and compliance risks at scale.
AWS	Cloud & Infrastructure	AWS powers organizations with scalable, secure, and flexible cloud infrastructure, offering a full spectrum of computing, storage, and AI services.
Calltower	Cloud-based Unified Communications & Contact Center Solutions	Calltower provides integrated cloud communications, delivering enterprise-grade voice, video, messaging, and collaboration solutions powered by Microsoft and Cisco platforms.
Cayosoft	Manage, Monitor, Recover Hybrid Active Directory	Cayosoft streamlines hybrid Active Directory and Microsoft 365 management, automating administration, compliance, and security for modern enterprise IT environments.
Chronosphere	Observability & Monitoring	Chronosphere empowers enterprises with cloud-native observability, providing scalable monitoring and analytics to control costs and accelerate incident resolution.
CloudHealth by VMware	Cloud Cost Optimization & Governance	CloudHealth by VMware simplifies multicloud management, optimizing spend, governance, and security to ensure efficient, compliant cloud operations for enterprises.
Cycode	Application Security Posture Management (ASPM)	Cycode secures the software development lifecycle by providing end-to-end visibility, governance, and protection for code, secrets, and supply chain integrity.
Cyware	Security Orchestration, Automation & Response (SOAR)	Cyware delivers threat intelligence sharing and cyber fusion platforms, enabling proactive collaboration and automation for faster incident response and mitigation.
Doppel	Social Engineering Defense. (Brand/Phishing Protection)	Doppel protects brands and assets by detecting and eliminating digital impersonation threats, phishing, and fraud to secure organizational reputation.
Dynatrace	Observability & AIOps	Dynatrace is a software intelligence platform that provides unified observability and security solutions for modern cloud environments. It leverages AI to simplify cloud complexity, improve application performance, and enhance security.
Entrust	Identity-Centric Security Solutions	Entrust secures identities, payments, and data with trusted digital security solutions for enterprises operating in a connected, ever-evolving world.
Exagrid	Tiered Backup Storage	Exagrid delivers cost-effective backup storage optimized for fast data restores, scalability, and ransomware recovery across enterprise environments.
Fivetran	Automated Data Movement Platform	Fivetran automates data integration, delivering reliable, scalable connectors that centralize business data for analytics and faster, informed decision-making. An end-to-end data movement platform aimed at addressing the critical need for reliable, governed data for enterprise AI initiatives.
Forescout	Manage Cyber Risk and Mitigate Threats, Continuously	Forescout provides automated cybersecurity across IT, IoT, and OT, helping organizations discover, classify, and secure all their connected devices.
Genesys	Communication & Collaboration (Contact Center)	Genesys transforms customer experience with AI-powered cloud contact center solutions, orchestrating seamless, personalized interactions across every channel and touchpoint.
Glean	Enterprise-Grade Artificial Intelligence	Glean enhances workplace productivity with AI-powered enterprise search, enabling employees to instantly find documents, knowledge, and experts across organizations.
Grafana Labs	Open and Composable Observability Platform	Grafana Labs empowers organizations with open, extensible observability solutions to visualize, monitor, and analyze application and infrastructure performance at scale.
Illumio	Breach Containment & AI Cloud Detection and Response (CDR)	Illumio leverages an AI security graph to deliver Zero Trust microsegmentation, preventing cyberattacks from spreading by visualizing, isolating, and securing critical applications in hybrid, multicloud environments.
infobip	Conversational Customer Experiences	infobip connects businesses and customers worldwide, delivering seamless omnichannel communications for messaging, voice, email, and customer engagement at every touchpoint.

Intel	Infrastructure (CPU's & GPU's)	Intel powers digital transformation, developing advanced processors, AI, and compute technologies that enable intelligent, high-performance solutions across industries globally.
Keysight	Design, Emulation, & Test Solutions to Connect and Secure	Keysight enables advanced network testing, competitive cost-efficiency, and flexible monitoring solution. These tools help validate, optimize, and safeguard critical infrastructure.
Lenovo	Infrastructure (Compute, Storage & Endpoints)	Lenovo drives smarter technology for all, providing innovative devices, infrastructure, and solutions to enable productivity and flexibility for modern enterprises.
Okta	Secure Identity for Employees, Customers, and AI	Okta secures digital identities, delivering seamless and secure access management solutions that empower organizations to connect people safely to applications.
One Identity	Protect & Simplify Access to Digital Identities	One Identity streamlines identity and access management, ensuring governance, privileged access, and compliance to protect critical systems and simplify administration.
Opengear	Infrastructure Network Resilience & Data Center Management	Opengear ensures always-on network resilience, delivering secure, out-of-band management solutions for remote monitoring, remediation, and business continuity.
OutThink	Cybersecurity Human Risk Management Platform	OutThink proactively transforms security culture, delivering intelligent cybersecurity awareness and risk management solutions to reduce human error across organizations.
Prompt	GenAI Security	Prompt optimizes developer productivity, leveraging AI-driven solutions to automate workflows, increase efficiency, and streamline application development across teams.
ProsperOps	Automatic Cloud Cost Optimization Software	ProsperOps automates cost optimization for AWS, maximizing cloud savings through autonomous, real-time management for efficient cloud financial operations.
Radiant Logic	Data Foundation for Identity-First Security Strategy	Radiant Logic simplifies identity data integration, delivering a unified identity platform that connects, correlates, and secures user access across hybrid environments.
Red Hat	Open Source Technologies for the Enterprise	Red Hat accelerates enterprise innovation with open-source software, delivering trusted cloud, automation, and container solutions for agile digital transformation.
Safe Security	Cyber Risk Quantification	Safe Security quantifies and reduces cyber risk with AI-driven, continuous risk assessment, helping organizations proactively strengthen security posture and compliance.
Sharp Decisions	IT Staffing & Professional Services	Sharp Decisions delivers IT consulting and staffing solutions, empowering organizations with agile technology expertise to drive successful business transformations.
SquareX	Browser Detection and Response (BDR) Solution	SquareX protects users with browser-based security, isolating web threats to ensure safe and private online experiences without compromising performance.
StackHawk	API Security Testing and Modern DAST	StackHawk empowers developers to ship secure code, integrating automated application security testing into CI/CD pipelines for rapid vulnerability detection. Modern DAST (Dynamic Application Security Testing)
Tines	Security Automation & Orchestration of Intelligent Workflows	Tines automates security and IT workflows, enabling teams to respond faster to threats with no-code, customizable workflow automation. Tines helps streamline operations at scale. With Tines, IT teams can: Automate repetitive IT workflows across systems and teams.
Vanta	Compliance and Risk Management	Vanta's trust management platform automates 30 security frameworks, including SOC 2 and ISO 27001, saving you time and simplifying the compliance process.
Veeam	Data Portability and Resilience	Veeam ensures business continuity with modern data protection, delivering backup, recovery, and ransomware resilience for cloud, virtual, physical, and SaaS environments.
VMware by Broadcom	Cloud Computing for the Enterprise	VMware by Broadcom advances enterprise agility with multi-cloud infrastructure, delivering secure virtualization, automation, and networking solutions across IT environments.
Zoom	Communication & Collaboration	Zoom enables seamless video communication and collaboration, connecting people through meetings, webinars, chat, and phone for productive hybrid work experiences
